

How to use public phone TDD

1. Lift the telephone handset and lay it down on the payphone shelf or you may place the handset in the special cradle, if it provided.
2. Turn on the TDD by pressing spacebar several times. A steady glow of the "PHONE" light indicates a dial tone.
3. Deposit the required coins. Dial the phone number as you would normally, using the payphone keypad. The "PHONE" light indicates whether the number you called is ringing or busy.
4. You will see the message on the green screen of the TDD as it is received. You may now proceed with your call as usual.
5. Please remember to hang up the payphone handset. The TDD will turn off by itself.

Thank you for using Krown's product. For help with your call, dial the TDD operator at 1 (800) 855-1155.
